

FATAVAT ARMAN

Data Scientist(Fresher)

+91 8866631973 armanfatavat111@gmail.com LinkedIn GitHub India

Profile

Data Science enthusiast with hands-on experience in Python, SQL, Machine Learning, data analysis, and data visualization. Experienced in building end-to-end ML projects using Python, Scikit-learn, XGBoost, Pandas, and Flask. Interested in Data Science, Machine Learning, and AI-driven solutions.

Skills

Programming: Python, SQL, Java (Basic)

Data Science & ML: Pandas, NumPy, Scikit-learn, Machine Learning, Supervised Learning, Unsupervised Learning

Visualization: Matplotlib, Seaborn, Plotly, Power BI, Excel

Tools & Technologies: Flask, Jupyter Notebook, Google Colab, GitHub, VS Code, REST APIs

Experience

Machine Learning Intern

July 1, 2026 – September 14, 2026

FlyRank AI

Remote

- Worked on practical machine learning tasks involving data preprocessing, analysis, model development, and evaluation.
- Applied Python and data science libraries to build and experiment with machine learning solutions.
- Gained hands-on experience with end-to-end ML workflows and working with real-world datasets.

AI Agentic Intern

July 3, 2026 – July 17, 2026

CRIX Technology Pvt. Ltd.

Remote

- Completed a 15-day GTU internship focused on Agentic AI and AI application development.
- Developed chatbot using python basic level.

Foundation of AI Intern

April 2025 – May 2025

Edunet Foundation (AICTE Approved Internship)

- Applied Python, Pandas, NumPy, and Scikit-learn for data preprocessing and machine learning workflows.
- Worked with datasets for feature engineering, model development, and evaluation.

Projects

SmartCrop – Crop Recommendation System

Python, Flask, Scikit-learn, Pandas, NumPy

- Developed an ML web application recommending suitable crops using N, P, K, temperature, humidity, pH, and rainfall.
- Built an end-to-end pipeline for preprocessing, feature scaling, model training, evaluation, and prediction.
- Integrated the trained model with a Flask backend and responsive frontend for real-time recommendations.

SmartValuation – House Price Prediction System

Python, Flask, XGBoost, Scikit-learn

- Developed a full-stack application to predict residential property prices using the Ames Housing Dataset.
- Built an XGBoost regression pipeline with preprocessing, One-Hot Encoding, feature scaling, and model serialization.
- Integrated the trained model with a Flask backend and responsive web interface.

Certifications

Python for Data Science – IBM (2025)

 Verify

Data Analysis with Python – IBM (2025)

 Verify

Data Visualization with Python – IBM (2025)

 Verify

Machine Learning – IBM via Coursera (2025)

 Verify

Achievements

- Participant, UNESCO Global Youth Hackathon 2025 – collaborated with international teams on a social-impact project.
- Participant, Smart India Hackathon 2025 – contributed as Data Engineer in the “Visionary Herd” team.

Education

Bachelor of Engineering – Computer Engineering

Government Engineering College, Palanpur

Expected 2027

Gujarat Technological University (GTU)
